EDUCATION

Columbia University

Master of Science in Business Analytics

Courses: Data Analytics, Business Analytics, Marketing Analytics, Probability & Statistics

New York, NY

Aug 2025 ~ Present

National Taiwan University

Department of Finance | Business Analytics Program, GPA 4.01 / 4.30

Courses: Programming Design, Data Analysis and Machine Learning with Python, Programming for Business, Social Media Analytics, Business Intelligence and Data Analytics, Financial Statement Analysis, Financial Modeling

Taipei, Taiwan (R.O.C.)

Sep 2020 ~ Jan 2025

WORK EXPERIENCE

BCG (Boston Consulting Group)

Business Analyst Intern

- Conducted industry research and competitor benchmarking for semiconductor clients, synthesizing findings into pitch decks that supported multimillion-dollar strategy projects.
- Collaborated with BCG X data scientists and consultants to co-develop a demand forecasting model, combining business rules with Python algorithms to improve forecast accuracy by ~20% compared to manual estimates.
- Identified supply chain risks and enhanced client planning by providing insights that reduced potential stockouts and excess inventory risk, strengthening resilience across production and inventory operations.

Taipei, Taiwan (R.O.C.)

Apr 2024 ~ Dec 2024

IBM

Associate Business Consultant

- Engineered automated workflows leveraging web crawling, data mining, and prompt engineering with Python, ChatGPT, and LangChain, cutting manual data processing time by >70%.
- Guided integration of ESG criteria into a generative AI-based credit assessment model, achieving an 85% workload reduction while enhancing data accuracy.

Taipei, Taiwan (R.O.C.)

Jul 2023 ~ Aug 2023

Deloitte

Actuarial and Insurance Solutions Consulting Intern

- Executed actuarial modeling, reserve calculations, and compliance reviews in IFRS 17 and VM-21 implementation projects.

Taipei, Taiwan (R.O.C.)

Feb 2023 ~ Jun 2023

PROJECT EXPERIENCE

Sinyi Realty, Current House Price Prediction Model Enhancement

Feb 2024 ~ Jul 2024

- Built a predictive model for real estate pricing applying property clustering and XGBoost, achieving an 80% forecast accuracy on public housing datasets.
- Applied web crawling and data mining techniques to collect and preprocess large-scale property transaction data, ensuring data quality and model reliability.
- Visualized pricing trends and model outputs through Python dashboards, providing insights for property valuation and investment strategy.

NTU, Mining Google Map Reviews Using Aspect-Based Sentiment and Eigenvector Centrality Analysis

Feb 2024 ~ Jul 2024

- Built an aspect-based sentiment analysis pipeline employing PyABSA and FAST_LCF_ATEPC, structuring unorganized Google Map reviews to surface key consumer preferences.
- Collaborated in a project team to apply eigenvector centrality analysis on review aspects, ranking critical factors (e.g., taste, ambiance, service) and surfacing structured consumer insights.

Gogoro, Public Opinion Analysis & Market Strategy Enhancement

Mar 2023 ~ Jun 2023

- Automated sentiment grading of 50,000+ consumer comments obtained via web crawling, leveraging ChatGPT and LLM-based text mining, reducing manual review effort by ~70%.
- Directed dashboard development with teammates, integrating Python, HTML, and CSS to enable real-time monitoring of market sentiment.
- Identified key consumer concerns and emerging market trends, providing insights that informed product positioning and strategy decisions.

ACADEMIC EXPERIENCE

NTU Data Analytics Club

Project Analyst

- Led case-solving efforts in a project team SQL, Tableau, Python, and Excel, generating actionable insights for strategy recommendations.
- Produced data analysis reports that translated technical findings into actionable business implications.

Taipei, Taiwan (R.O.C.)

Sep 2022 ~ Sep 2023

TMBA (Taiwan Management & Business Association)

Analyst of Equity Capital Market & Global Investment Research

- Conducted research on solar energy industry, including company benchmarking, investment potential, and risk assessment.
- Analyzed US Dollar Index and REITs, evaluating macroeconomic conditions, currency policies, and investment targets.

Taipei, Taiwan (R.O.C.)

Jul 2022 ~ Aug 2022

J.P. Morgan Private Bank Challenge

Regional Finalist (Top 6 in Asia)

- Generated client asset allocation reports with portfolio recommendations, projecting an expected return of \$4.2M with 12.01% volatility.

Asia (TW, CN, SG, HK)

Mar 2022 ~ Apr 2022

SKILLS

- Programming & Data Science:** Python (Pandas, NumPy, Scikit-learn, XGBoost), R, SQL, C++, Web Crawling
- AI & Machine Learning:** Generative AI (ChatGPT, LangChain), Prompt Engineering (CoT, few-shot), NLP (PyABSA, sentiment analysis), Predictive Modeling
- Data Visualization & BI:** Tableau, Streamlit, Excel, Power BI, Matplotlib, Seaborn
- Web & Tools:** HTML, CSS, JavaScript, Git
- Languages:** Mandarin (Native), French (Elementary)
